DETAILED ACTION

1. This application has been reviewed. Original claims 1-9 are pending. The rejections cited are as stated below:

Claim Rejections - 35 USC 103

- 2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 3. The factual inquiries set forth in *Graham v. John Deere Co.*, 148 USPQ 459, that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:
 - 1. Determining the scope and contents of the prior art.
 - 2. Ascertaining the differences between the prior art and the claims at issue.
 - 3. Resolving the level of ordinary skill in the pertinent art.
 - 4. Considering objective evidence present in the application indicating obviousness or unobviousness.
- 4. Claims 1-9 are rejected under 35 U.S.C. 103(a) as being unpatentable over Downing et al. (United States Patent Number 5,963,647) in view of Stoutenburg et al (United States Patent Number 6,488,203).

Claims 1-9, Downing teaches a method and a corresponding system for electronically transferring funds between a sender and a recipient comprising:

Art Unit: 3624

receiving at an initiating terminal a designation of an amount of funds, a stored value card, or cash to be electronically transferred from the sender, receiving at the initiating terminal a security code from the sender, generating a unique personal identification number at a central terminal, providing the unique personal identification number to the sender, storing the designation of an amount of funds, the security code and the unique personal identification number at the central terminal in communication with the initiating terminal, receiving the unique personal identification number and the security code at a kiosk from the recipient, communicating the unique personal identification number and the security code provided by the recipient to the central terminal, comparing the unique personal identification number and the security code provided by the recipient to the stored unique personal identification number and stored security code at the central terminal, and dispensing funds corresponding to the designation of an amount of funds at the kiosk if the unique personal identification number and the security code provided by the recipient match the stored unique personal identification number and the stored security code (abstract, figs. 2, 5, 6, column 5, line 16-46, and column 9, line 56 thru column 12, line 55).

Downing fails to teach the use of a kiosk agent and a scanning device for receiving the security code.

Stoutenburg teaches the use of a kiosk agent and a scanning device for receiving the security code (fig. 1, and column 3, line 10 thru column 4, line 42).

It would have been obvious to one of ordinary skilled in the art at the time

Applicant's invention was made to modify the teachings of Downing to include a kiosk

Art Unit: 3624

agent and a scanning device for receiving the security code, because it greatly improves the efficiency of the system and provides the user with assistance in conducting the transaction. Downing supports this aspect of providing assisted transactions (Downing, column 5, lines 40-46).

Conclusion

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Hani Kazimi whose telephone number is (703) 305-1061. The examiner can normally be reached Monday-Friday from 8:30 AM to 5:00 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Vincent Millin can be reached at (703) 308-1065.
